

SCHEDULE H: SERVICE DEFINITION FOR MULTI-CHANNEL RECORDING SERVICE

1. Multi-Channel Recording Service Description

The Multi-Channel Recording Service offering provides a centralised, cloud based, recording solution. It enables the features and functionality to record voice calls, video calls, instant messages and screen shares when utilising Vysiion’s TCaaS service offering and record voice calls when utilising Vysiion’s UCaaS and CCaaS Services. Through a series of collector software, calls, messages and screen shares are captured and moved to the centralised recording platform on a real-time basis for processing and storage. A number of additional features and services are also available to provide Quality Assurance Call Scoring, QA Randomizer, Workforce Optimisation and Reporting and Analytics. The Multi-Channel Recording Service offering will consist of one of the following mandatory licenses:

Features	Functional summary	Core Recording License	Analytics Recording License
256-bit AES rotating encryption,	The multi-channel recording service fulfils regulatory compliance standards by encrypting each recording with a 256-bit AES rotating encryption and stores them on our secure cloud servers.	✓	✓
Geographic redundancy	The platform is built across geographically resilient server architecture and calls are stored securely in the cloud and can be made to be redundant across multiple geographical storage locations.	✓	✓
Unified Location Data Sovereignty	The multi-channel recording service addresses both the data sovereignty and compliance sharing issues. Our global, geographically resilient storage network satisfies sovereignty regulations.	✓	✓
Multi-Factor Authentication support	MFA provides additional layers of security to the sign-in process. Users provide additional identity verification using multiple devices. E.g. entering a code received on a mobile phone.	✓	✓
Unlimited Recordings and Storage	Users can store, stream, and download recordings without any limits.	✓	✓
Role-Based Access	Tiered levels of secure access based on an admin user’s functional role and requirements for data and privacy.	✓	✓
Call Playback	Call recording allows you to record and store a library of your past calls, providing you easy access to any call you like, at any time.	✓	✓
Call Flagging, Searchable Call Tagging	Categorisation of calls by adding contextual labels to call recordings. These labels can be used to quickly search through call recordings.	✓	✓
Call Notes, Agent and/or Team Grouping	Ability to add notes to a recorded call, grouped by agent or team.	✓	✓
Customer Retention Policies	Allows customers to predefine the retention period of their call recordings.	✓	✓
Basic API Support.	API support to provide access to call records, call data and the ability to download calls to third-party applications.	✓	✓

Features	Functional summary	Core Recording License	Analytics Recording License
Unlimited Advanced Admin Licenses	Access to enhanced call details, screen capture/recording, emotion and sentiment analysis, advanced reporting, enhanced compliance call sharing and call notes.		✓
Unlimited Speech-to-Text Transcription	Unlimited transcription of conversations in real-time.		✓
Emotion and Sentiment Analysis,	Categorisation of how callers are feeling, enabling customers to analyse trends and improve customer satisfaction.		✓
Enhanced Call Details	Offers exhaustive data for every call you have recorded. Some of the functions include adding tags, place a call on legal hold etc.		✓
Advanced Reporting	Advanced reporting lets businesses create customized reports that better match their business needs. Benefits include improved business insights, more informed decisions, and greater productivity.		✓
Enhanced Compliance Call Sharing,	Ability to share compliance call recordings outside of the call recording platform.		✓
Call Section Notes	Ability to annotate different call sections within a call recording.		✓
Time-based Call Notes	Notes pinned to a particular time within a call recording.		✓
Keyword Search	Search criteria for key words, analysing call transcriptions and returning a list of every instance a keyword has been used.		✓
Key Phrase Search	Search criteria for key phrases, analysing call transcriptions and returning a list of every instance the key phrase has been used.		✓
PCI DSS Redaction Module	Automated redaction of card payment information from the call recording for compliance purposes.		✓
Analytics Dashboard	Administrator dashboard for agent scoring and call recording analytics. Includes automatic agent scoring.		✓
