

SCHEDULE I: SERVICE DEFINITION FOR ANALYTICS FOR MS TEAMS SERVICE

1. Analytics for MS Teams Service Description

The Analytics for MS Teams Service is a business intelligence reporting tool for MS Teams. It is designed to provide insight into how customers are using their MS Teams environment to improve productivity, customer service, cost management and user adoption. The Analytics for MS Teams Service presents information through scheduled and ad hoc reports, dashboards and monitors. Data is based on Call Data Records extracted via the Microsoft Graph API and is 'near real-time'. The Analytics for MS Teams Service offering will consist of the following mandatory license:

Mandatory Licenses	Description
Flex UC Analytics	Delivers insight into an organisation's utilisation of MS Teams historical activity data through ad hoc and scheduled reports, dashboards and monitors. Key metrics around employee productivity, call activity, capacity management and call quality.

The following add-on licenses can be purchased when using the Flex UC Analytics package:

Analytics Add-On Licenses	Description
Flex Call Queue	Enables the configuration of Teams call queues and auto attendants and agents through role-based access, delivering live and historical data. When taking the Flex Call Queues add-on license, the Customer will also be charged by Microsoft for two additional applications (Azure Import Function and Calls in Queue Function Application) necessary to gather the live and historical data.
Flex License Adoption	License allocation, consumption and usage metrics for O365 and Teams.
