Carbon Reduction Plan (CRP)

This Carbon Reduction Plan (CRP) template is designed to help you outline your current carbon footprint, reduction targets, and planned initiatives in line with recognised best practice and the Science Based Targets Initiative (SBTi). It provides a simple structure for reporting emissions and setting credible, measurable goals.

1. Company Information

Company Name: Vysiion Limited

Date Completed: 02/11/2026

Contact Person: Danielle Beasant

Commitment to Net Zero (if applicable): By 2050

2. Baseline Emissions & Recent Data

Baseline year: 2025

Optional: Details related to emissions data (sites, divisions, activities included, any environmental standards that organization has already):

_____

_____

Baseline Year Emissions (tCO_2e):

Emission Source	**Emissions (tCO_2e)**
Scope 1	166.77
Scope 2	610.59
Scope 3	244.55
Total	1021.92

Note: Scope 3 includes purchased goods and services, business travel, waste disposal, and other indirect emissions.

Current Year: 2025

Current Year Emissions (tCO_2e):

Emission Source	Emissions (tCO_2e)
Scope 1	173.48
Scope 2	1040.77
Scope 3	412.13
Total	1626.38

Note: Please report your most recent full-year data. Ensure consistency in reporting boundary and methodology.

3. Emissions Reduction Targets

Please outline your emissions reduction targets below. Science Based Targets (SBTs) require businesses to reduce absolute Scope 1 and 2 emissions by approximately 42–50% by 2030 from a defined baseline year, in line with a 1.5°C pathway. Longer-term targets should aim for at least a 90% reduction by 2050 or earlier.

Example Commitments, please add percentage and year and change accordingly. Scope 3 commitments do not need percentages and dates, however, there can be a general commitment to monitor, measure and reduce:

- We commit to reduce absolute Scope 1 and 2 greenhouse gas emissions by 42 % by 2030 (year) from a 2024 (year) baseline and continue progressing toward near-zero emissions by 2050.

- We commit to tracking our Scope 3 emissions annually and implementing actions that reduce them over time, such as optimising logistics, reducing waste, and sourcing lower-carbon materials.

4. Planned Initiatives and Actions

Please describe the key projects, initiatives, or changes you plan to implement to help meet your targets. This could include energy efficiency measures, renewable energy use, fleet electrification, waste reduction, supply chain engagement, or process improvements.

Examples:

- Switch to 100% renewable electricity by 2026
- Transition fleet to electric vehicles by 2030
- Engage key suppliers to measure Scope 3 emissions

Your initiatives:

2025–2030 Planned Initiatives: See below

5. Monitoring and Reporting

Carbon data and progress against targets should be reviewed and updated annually. Suppliers are encouraged to track emissions year-on-year, maintain consistent methodologies, and report progress transparently through their CRP or other sustainability disclosures.

6. Declaration and Sign-Off

Name: Peter Clapton

Date: 11 / 02 / 2026

Signature: Peter Clapton

2025–2030 Planned Initiatives:

Investigate biodiesel and alternative fuels to reduce company vehicle emissions.

Introduce sustainable, responsibly sourced and recycled workwear.

Improve meeting room technology to encourage remote meetings and reduce business travel.

Develop the Langley Park office forest and green space.

Establish a company-wide Carbon Action Forum to encourage staff involvement in emissions reduction.

Increase employee awareness of carbon usage and sustainable practices.

Monitor emissions annually and identify further opportunities to reduce Scope 1, 2 and 3 emissions.
